

EASIER

Skirting & mouldings

To complete the great look of your wooden floor, Tarkett offers a wide selection of skirting and mouldings – you can be almost certain to find the perfect match for your floor.

Since wood is a living material you should always leave space – an expansion gap – of 1.5mm per meter width of floor or a minimum of 8 to 10mm between the floor and thresholds, pipes, steps, fireplaces, stone floors etc. The expansion gap is hidden by using skirting, mouldings or pipe collars. Consult www.tarkett.com for more inspiration.

Tarkett Combistar profiles are an innovative new product in the Tarkett range. The transition profiles are available with a genuine wood veneer surface and are fitted very easily. The mounting rail is screwed down and the profile is fixed onto it. This leaves room for great flexibility and adjustment in order to make a perfect fit between surface and profile.

Clipstar veneer mouldings are available in a great number of wood species. The clip system is extremely user-friendly: the moldings are fitted easily by being mounted on the clips that are attached to the wall separately.

Matching surface finisher
No matter whether your wooden floor is treated with Proteco Lacquer or Proteco Natura you can find matching profiles, mouldings, stair noses and pipe collars.

SOLID TRANSITION MOULDINGS		
	Lacquer	Natura
Reducer for 13-17 mm 58x19, 10x2,00 rm		
Oak	•	•
