

Commercial carpet tiles

Tecsom DecoVision

Carpet tiles with
unique broadloom effect

Hundreds of colour and
pattern combination possibilities

Tecsom DecoVision

DecoVision Spirit

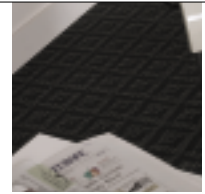

DecoVision is the first enhanced graphic loop Carpet tile that can be laid broadloom even with random or geometric patterns.

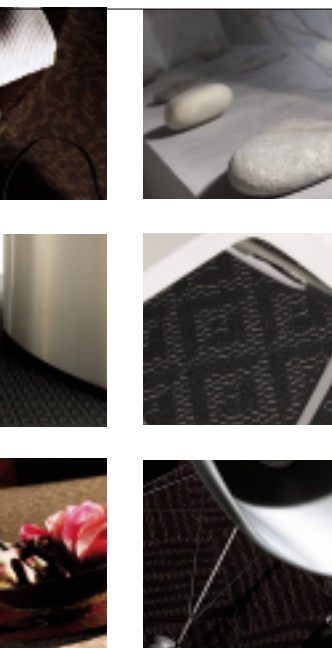

This technology exclusively developed and patented by Tarkett creates a new textile surface : patterns suggest visual depth, optical relief and even reveal woven effects in an environment where joints become virtually invisible.

This range has been conceived for areas requiring decoration with excellent wear resistance. Some of the patterns have been especially created for market segments such as commercial offices, retail stores and leisure environments and others for fashionable environments such as boutiques, casinos, restaurants, and cafeterias.

Designs combine confident linear and subtle geometric shapes, as well as the more traditional abstract designs.

The unique feature of DecoVision is that this carpet tile collection can be laid in the same direction, achieving excellent broadloom effect, or alternatively the traditional quarter turn method can be used.

Choose your favourite combination from 19 patterns and 11 colours with a beige or blue accent !

Patterns

With the DecoVision CD ROM, discover the great variety of possibilities with patterns and colours. You can create hundreds of combinations with the Decovision collection.

Tecsom carpet tile

DecoVision is a **Tecsom carpet tile**. The Tecsom range offers a wide range of constructions, colours, and designs, giving an exceptional opportunity to create stunning and unique interiors for working environments.

A combination of superb aesthetic qualities with a high level of technology.

BS Backing System

DecoVision tiles, as well as all Tecsom carpet tiles, are manufactured using the Tarkett Backing System, consisting of a double calendered vinyl coating stabilised with glass fibre reinforcement.

Tarkett's unique Backing System ensures total dimensional stability while offering a flexibility level and tear resistance far superior to those of any other product. It has outstanding acoustic performance and also optimises underfoot comfort, which are so valuable in a working environment.

Tarkett Backing System guarantees:

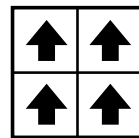

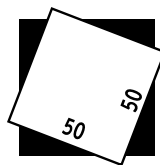

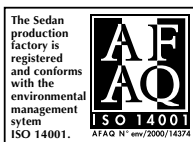

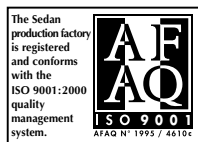

- An excellent dimensional stability, giving an excellent broadloom installation.
- The Environmental consideration: BS is part of Tarkett recycling chain - it is made of 100 % recycled vinyl.
- Possible loose lay installation.
- High resistance to castor chair use in high traffic areas: BS backing does not break down and does not tear.

YS Yarn System

A specific yarn selection for DecoVision provides organic tones associated with a natural beige or a sophisticated blue accent. These specific light accent yarns have been conceived with easy cleaning properties.

Tarkett manufacture their own technical yarns to give the Tecsom carpet tile outstanding aesthetic qualities and technical performances: appearance retention, resistance to light and wear as well as easy maintenance.

This high performing textured graphic loop is particularly suited for heavy traffic and commercial use areas requiring a high aesthetic value.
